CONTENTS

Preface ix

Structural and electronic properties of implanted metal hydrides 1
A. Traverse and H. Bernas (Orsay, France)

From permanent magnets to rechargeable hydride electrodes. 13
J. J. G. Willems and K. H. J. Buschow (Eindhoven, The Netherlands)

1. STRUCTURAL PROPERTIES

NMR search for evidence of hydrogen pairing in h.c.p. yttrium 31
L. Lichty, R. J. Schoenberger, D. R. Torgeson and R. G. Barnes (Ames, IA U.S.A.)

Orthorhombic structure of γ-$TiFeD_2$. 39
P. Fischer, J. Schefer (Würenlingen, Switzerland), K. Yvon (Genève, Switzerland), L. Schlapbach and T. Riesterer (Zürich, Switzerland)

Redistribution of deuterium atoms in α-$VD_{0.3}$ single crystal under stresses 47
M. Takakusaki, T. Kajitani and M. Hirabayashi (Sendai, Japan)

Phase relationships and phase transitions in the homogeneity range of pure CeH_2–CeH_3 57
E. Kaldis, E. Boroch and M. Tellefsen (Zürich, Switzerland)

A new study of the structure of $LaNi_5D_{6.7}$ using a modified Rietveld method for the refinement of neutron powder diffraction data 65
C. Lartigue (Meudon, France), A. Le Bail (Le Mans, France) and A. Percheron-Guégan (Meudon, France)

Neutron powder diffraction and inelastic scattering study of the structures of Zr_2Pd, $Zr_2PdD_{1.70}$ and $Zr_2PdD_{1.96}$ 77
A. J. Maeland (Morristown, NJ, U.S.A.), E. Lukacevic, J. J. Rush and A. Santoro (Gaithersburg, MD, U.S.A.)

Phase transformations in the Ti–H system at high pressures 93
E. G. Ponyatovsky, I. O. Bashkin, V. F. Degtyareva (Moscow, U.S.S.R.), Yu. A. Aksenov (Sverdlovsk, U.S.S.R.), V. I. Rashchupkin and D. N. Mogilyansky (Moscow, U.S.S.R.)

The accommodation of strain and particle size broadening in Rietveld refinement; its application to de-deuterided $LaNi_5$ alloy 105
P. Thompson, J. J. Reilly and J. M. Hastings (Upton, NY, U.S.A.)

Hydrogen absorption in some compounds of $MoSi_2$-type structure 115
A. F. Andresen (Kjeller, Norway) and A. J. Maeland (Morristown, NJ, U.S.A.)

An X-ray diffraction study of hydride precipitation in the systems, Nb–H and Nb–5at.%Mo–H 123
A. Drake (Birmingham, U.K.), T. R. Finlayson (Clayton, Victoria, Australia) and I. R. Harris (Birmingham, U.K.)

Structural and magnetic properties of $RE_2Fe_{14}BH(D)_x$; RE ≡ Y, Cr, Er 133
P. Dalmas de Reotier, D. Fruchart, L. Pontonnier, F. Vaillant, P. Wolfers, A. Yaouanc, J. M. D. Coey (Grenoble, France), R. Fruchart and Ph. L'Heritier (Saint-Martin d'Hères, France)

Electric field gradients in different niobium hydride phases 145
J. M. Gil, P. J. Mendes, A. P. de Lima, N. Ayres de Campos (Coimbra, Portugal), S. Yuquin, R. Peichl and A. Weidinger (Konstanz, F.R.G.)

Location of deuterium in $YD_{0.176}$ at 573 K 153
D. Khatamian (Toronto, Ontario, Canada)

A new hydride phase of $LaNi_5H_3$ 159
E. Akiba, K. Nomura and S. Ono (Ibaraki, Japan)

A neutron diffraction study of ZrD_2 up to the pressure of 10 GPa 165
V. P. Glazkov, A. V. Irodova, V. A. Somenkov, S. Sh. Shilstein and S. P. Besedin (Moscow, U.S.S.R.)

Crystal structure and volume effects in the hydrides of d metals. 171
V. A. Somenkov, V. P. Glazkov, A. V. Irodova and S. Sh. Shilstein (Moscow, U.S.S.R.)

Localization of hydrogen (deuterium) in α-$LaNi_5H_x$ (x = 0.1 and 0.4). 181
J. L. Soubeyroux (Grenoble, France), A. Percheron-Guégan and J. C. Achard (Meudon, France)

Localization of hydrogen (deuterium) in Hf_2FeD_x (x = 0 - 5) 187
J. L. Soubeyroux, D. Fruchart, S. Derdour, P. Vuillet (Grenoble, France) and A. Rouault (Saint-Martin d'Hères, France)

Hydride phase composition and crystal structure in Zr_2PdH_x. 197
F. E. Spada (San Diego, CA, U.S.A.), R. C. Bowman, Jr. (Los Angeles, CA, U.S.A.) and J. S. Cantrell (Oxford, OH, U.S.A.)

*Structure and magnetism of $Ho_6Fe_{23}D_x$ and Laves phase compounds 207
J. J. Rhyne, K. A. Hardman-Rhyne (Gaithersburg, MD, U.S.A.), H. K. Smith and W. E. Wallace (Pittsburgh, PA, U.S.A.)

*Low temperature structure of Mg_2NiD_4: a combined study of high resolution X-ray and neutron diffraction 208
P. Zolliker, K. Yvon (Genève, Switzerland), Ch. Baerlocher (Zürich, Switzerland), J. D. Jorgensen and F. Rotella (Argonne, IL, U.S.A.)

*Hydridoaluminates of alkaline metals 209
J. P. Bastide, J. C. Bureau, P. Claudy, J. M. Letoffe and J. El Hajri (Villeurbanne, France)

*Studies of the Mg_2Ni–Mg_2NiH_4 system 210
D. Norèus (Stockholm, Sweden)

*Preparation, structure and properties of Mg_2CoH_5 211
P. Zolliker, K. Yvon (Genève, Switzerland), P. Fischer and J. Schefer (Würenlingen, Switzerland)

2. DYNAMICS OF HYDROGEN

Study of hydrogen diffusion in Zr–Ni alloys by ^{181}Ta perturbed angular correlation spectroscopy 213
P. Boyer and A. Baudry (Grenoble, France)

---

*Abstract of a paper presented at the International Symposium on the Properties and Applications of Metal Hydrides V, Maubuisson, France, May 25 - 30, 1986.

Tracer diffusion coefficients of hydrogen at high concentration in b.c.c. host metal lattices 223
E. H. Sevilla and R. M. Cotts (Ithaca, NY, U.S.A.)

Monte Carlo calculation of the incoherent quasi-elastic scattering function for hydrogen in b.c.c. metals 229
D. A. Faux and D. K. Ross (Birmingham, U.K.)

Structure of the hydrogen arrangement around a positive muon in α'-PdH_x 237
F. N. Gygax, A. Schenck (Villigen, Switzerland), S. Barth, T. Riesterer and L. Schlapbach (Zürich, Switzerland)

Low-temperature diffusion of hydrogen isotopes in tantalum. 243
R. Peichl, P. Ziegler and A. Weidinger (Konstanz, F.R.G.)

Hydrogen diffusion in $(Fe_{1-y}Ni_y)Ti$ hydride using Mössbauer studies 251
P. Raj and A. Sathyamoorthy (Bombay, India)

Hydrogen absorption by $LaCu_5$ and nuclear magnetic resonance (NMR) studies of hydrogen diffusion in β-$LaCu_5$ hydride 261
F. E. Spada (San Diego, CA, U.S.A.), R. C. Bowman, Jr. (Los Angeles, CA, U.S.A.) and J. S. Cantrell (Oxford, OH, U.S.A.)

Mössbauer study of diffusion and lattice distortions in the hydrides and deuterides of niobium. 271
R. Wordel and F. E. Wagner (Garching, F.R.G.)

Dynamical evidence of hydrogen sublattice melting in metal–hydrogen systems . . . 279
R. G. Barnes, F. Borsa, M. Jerosch-Herold, J.-W. Han, M. Belhoul, J. Shinar, D. R. Torgeson, D. T. Peterson (Ames, IA, U.S.A.), G. A. Styles and E. F. W. Seymour (Coventry, U.K.)

Long-range and short-range ordering of hydrogen or deuterium atoms in solid solution in yttrium 287
J. E. Bonnet (Orsay, France), D. K. Ross, D. A. Faux (Birmingham, U.K.) and I. S. Anderson (Gaithersburg, MD, U.S.A.)

Nuclear magnetic resonance (NMR) studies of hydrogen diffusion in Zr_2Ni hydrides 297
F. Aubertin, S. J. Campbell (Canberra, ACT, Australia), J. M. Pope (Kensington, N.S.W., Australia) and U. Gonser (Saarbrucken, F.R.G.)

Diffusion of hydrogen in niobium under hydrostatic high pressure 305
A. Pusch, W. Fenzl and J. Peisl (München, F.R.G.)

Formation of hydrides in small particles of palladium supported in Y-zeolite 311
H. Jobic and A. Renouprez (Villeurbanne, France)

Phase characterization and hydrogen diffusion study in the Mg–Ni–H system 317
J. Senegas, M. Y. Song, M. Pezat and B. Darriet (Talence, France)

A comperative muon spin relaxation (μSR) study of titanium and yttrium dihydrides 327
W. J. Kossler, H. E. Schone, J. R. Kempton, B. Hitti (Williamsburg, VA, U.S.A.), C. E. Stronach (Petersburg, VA, U.S.A.), G. A. Styles and E. F. W. Seymour (Coventry, U.K.)

Nuclear spin relaxation due to dipolar interactions in hexagonal crystals 335
C. A. Sholl (Armidale, N. S. W., Australia)

Nuclear magnetic resonance (NMR) studies of single-crystal metal–hydrogen systems 345
G. A. Styles, E. F. W. Seymour, K. J. Barnfather (Coventry, U.K.), C. A. Sholl (Armidale, N. S. W., Australia) and H. E. Schone (Williamsburg, VA, U.S.A.)

*The quantum nature of dilute metal–hydrogen systems. 355
A. Magerl (Grenoble, France)

*Hydrogen diffusion in amorphous Pd_xSi_{1-x} studied by quasielastic neutron scattering. 355
D. Richter (Grenoble, France), G. Driessen and R. Hempelmann (Jülich, F.R.G.)

*Tunnelling states of hydrogen in normal and superconducting niobium 357
H. Wipf, D. Steinbinder (Darmstadt, F.R.G.), K. Neumaier, P. Gutsmiedl (Garching, F.R.G.), A. Magerl and A. J. Dianoux (Grenoble, France)

*NMR rotating frame relaxation in the rigid lattice regime by spin–spin interactions 357
J. T. Markert and R. M. Cotts (Ithaca, NY, U.S.A.)

*Diffusion of hydrogen and deuterium in yttrium 358
J. T. Markert and R. M. Cotts (Ithaca, NY, U.S.A.)

*Diffusion of hydrogen in transition metals 358
R. P. Gupta (Gif-sur-Yvette, France)

*Recent developments in inelastic neutron scattering measurements on metal hydrides 358
M. H. Benham, D. K. Ross, P. W. Gilberd (Birmingham, U.K.), J. Penfold, A. D. Taylor, J. Tompkinson (Didcot, U.K.) and J. E. Bonnet (Orsay, France)
